

Information for our students

Dear students,

On Tuesday, 02/05 and Wednesday, 03/05, filming will be carried out at our faculty for our new study videos for INF-B and WIF-B. For this purpose, we may also shoot individual video sequences in your course.

The target group of the videos are prospective students. We want to show them what they can expect from us and what studying with us looks like. To do this, we need cross-sectional images, which we want to process later in our interviews (with fellow volunteers of yours = protagonists) and other course advertising.

Sectional images & protagonists (background knowledge)

Sectional images are the images that we later overlay "over the interview". Here we are looking for motifs that either reinforce or complement what was said in the interview. For example, if a protagonist talks about the sustainability of a company, it makes sense to show the company's PV system or an e-car at the same time. Since it is also a good idea to shoot cross-sectional images with the protagonists, we will put them to you if necessary. So please don't be surprised. 😊

Look good (clothes / "mask")

Since you may be part of our shots, we would also like to show you "in the best light" from your best side.

We are all vain in different ways. You are responsible for the "mask" and hairstyle. The question of the right clothing is also often raised.

In this case, an outfit that you would wear in everyday work or at customer appointments is recommended. Basically, shrill colors are not recommended. But if they express your personality, then bring them on. **The important thing is that you are authentic.** If you don't otherwise wear a suit, maybe you shouldn't start today.

If possible, please do not wear clothes *that are too dark*. For tops with a print, please pay attention to the statement or text or do not wear clothing with logos, preferably remain neutral in this regard. If possible, you should refrain from delicate patterns, as cameras have technical problems here (moiré effect).

Depending on the background and light, sometimes lighter, sometimes darker/muted tops look better. If you are the proud owner of a student council shirt or a TH shirt (or hoodie), you are welcome to wear it or bring it with you as a change of clothes. 😊

If, despite everything, someone does not want to be seen on our videos, please contact your professor or us in advance. If necessary, we will then take you aside during the recordings or implement them in such a way that we can still get good recordings.

Details that should also be paid attention to:

- clean fingernails,
- clean lenses etc.

The **cleanliness of the displays of your laptops, tablets**, etc. (and what's going on there right now) play a big role in the shoot. Please support us with (almost) freedisplays and purely

module-related screen "content". Please do not leave your drinks and food on the tables either. (partly also for reasons of publication)

Please support us

We have the rooms subjected to a special cleaning in advance in order to be able to present our rooms optimally. If you still discover dust or imprints on screens, dust on furniture, badly wiped boards, etc., we ask you to help eliminate such sources of error or to prevent others from occurring in the first place. This is especially important because we may need the rooms several times for recordings.

We would like to thank you in advance for your support. 😊

The use and dissemination of the (adapted) text to our protagonists and the organizing team was approved by the author Max Baudrexl specifically for the information during the video shoot on 02/03.05.2023 (Faculty of Computer Science). Other dissemination and duplication are only permitted with the direct request and permission of the author.
